**SITI**

"I've lived in this little village all my life. When my husband passed, I had to find a way to care for my young children. I started roasting nuts, using a recipe passed down through generations. Soon, people were drawn to the delicious smell and flavor. Now, I am looking forward to open a small shop."

"My name is Kenji and I've worked in this workshop over fifteen years. After my father's passing, I wanted to support my family. I dreamt of starting my own fabrication business, crafting custom metal projects. I poured my heart into my work, and now I have opened my own workshop to grow in this business."
